

We identify gaps in:

- » Literacy
- » Numeracy
- » Trainability
- » Personality
- » Leadership style
- » Decision-making style
- » Self-efficacy
- » Creativity

About Us

Since 2013, SebataSDC has helped over 4000 people to identify and address skills gaps. Our approach advances job-based education through facilitated training and our Small, Medium and Micro Enterprises incubator. Along the way, we have focused on promoting ICT businesses and New Venture Creation, and successfully reached historically under-served labour groups.

SKILLS
DEVELOPMENT
CENTRE

Providing transferable skills
to unemployed youth

Aged 18-35? Unemployed? Looking for a top-quality learnership opportunity?

We're the Sebata Skills Development Centre (SebataSDC) and we dream of a world of youth employment; a world in which young people can win, not just survive. We dream, like Archbishop Desmond Tutu says, "...of a world where poverty is history..." and so we take responsibility for closing the loop between you and learning.

Overview

What we offer isn't just a range of skills programmes. The skills we're teaching are relevant and transferable, enabling you to work for yourself or for others. We're also able to help you to find employment at your local municipality, first as an intern and later as a permanent employee. SebataSDC has focused on promoting ICT businesses and New Venture Creation, and successfully reached historically under-served, marginalised labour groups.

Short Courses

There is also a host of short courses to choose from, from 1 day to 12 months in duration, and covering finance; municipal financial management; communication and writing skills; ethics, supervision, leadership, and negotiation; computer skills; project management; and more.

What are the various SebataSDC learning opportunities?
